Dear Sir:

It was encouraging  
to see the film concerning  
your teaching of classes  
on the Viet Nam war.

Perhaps it will have  
much effect on letting  
the public know some  
facts and hopefully they  
will accept the facts.

It has been my  
privilege to work with  
our son-in-law and  
also with some of the  
teams and Doctors who

have worked with him.  
He is now considered  
a totally disabled  
Vietnam Veteran. He  
is a victim of Agent  
Orange.

When he returned  
from the war he was  
able to work some,  
but his condition became  
worse and worse.

Finally he was notified  
that he was in the  
Area that received the  
Chemical.

He has been in  
the hospital several  
times and since  
1982 has not been able

to engage in anything  
to help provide for the  
family.

It has been extremely  
hard on him and the  
family. He has not  
been able to be  
engaged in activities  
or help in much as  
far as the wife and  
children are concerned.  
In fact he has not  
been able to drive  
a car in about six  
years.

Thanks for your work.

A Great-Grandmother  
Mrs. Mildred Yaltz
