

dear prof. capps -

11/16

i took your vietnam class 2 yrs. ago ~ after having been a student, sporadically for 14 yrs, i finally took a class that made a huge difference in my life. As an anti-war activist, i never looked at the "flip-side" & saw that those in uniform were real human beings. I now know that we all want a world that works for everyone and our expression of it may be different.

i am currently a consultant for Werner arhard's assoc (the Forum, est training) and i travel all over the country. I meet many vets & am amazed how much compassion and understanding i have for them as a result of your class.

thank you for being a commitment to your students and for having school be a true education rather than classes to take for a degree.

Thank You,

Ruth Marek
